Experience truly modern medicine. Integrating the best conventional and complementary approaches, a Canyon Ranch physician guides you toward optimal health. Address your overall health and specific concerns, such as cardiovascular risk factors, and get a plan to help you prevent disease and possibly reverse existing conditions. Ask about any issues that concern you. You may receive recommendations for diagnostic and laboratory tests that provide a comprehensive view of your health. It’s an exceptional value on an invaluable service.

*Note: Diagnostics and tests are not included and may have additional fees.*

**DEXA BODY COMPOSITION**

Two-part service  | $495

The accurate assessment of body composition will help your physician, nutritionist, and performance scientist work with you in developing a plan to reach and maintain a healthy body weight. It measures not only total body fat but lean tissue and visceral fat. Although this test uses radiation, the amount is minimal; the radiation from 135 DEXA body composition measurements are equivalent to that from one chest X-ray.

**Part I (25 minutes)** – A physician administers the test and advises you about reducing your risk for disease.

**Part II (50 minutes)** – Meet with a Performance Scientist who interprets the test data and helps you set realistic goals for muscle mass and body fat levels.

**DEXA BODY COMPOSITION & BONE DENSITY EVALUATION**

Two-part service  | $775

This two-part service offers a state-of-the-art DEXA (Dual Energy X-Ray Absorptiometry) scan to diagnose measurement of your total body fat, lean tissue, visceral fat, and bone density. This information will help your Canyon Ranch medical providers develop a personalized exercise plan to get you to your healthy body weight, muscle mass, and bone mass goals.

Note: This test uses a low level of radiation and requires the removal of metal objects from the body.

**Part I (50 minutes)** – DEXA Scan Test
A physician administers the DEXA scan test and uses your results to advise on disease-risk reduction.

**Part II (50 minutes)** – Personalized Exercise Plan
A Performance Scientist interprets your test results and designs a personalized exercise plan.

Canyon Ranch does not provide super bills, i.e., insurance claim forms. Given the primarily preventive nature of our services, it’s been our experience that third-party payers, for even out-of-network services claims, do not provide reimbursement.

On your request, we will prepare an itemized receipt for your medical and/or Health & Performance services, which you can submit to your Flexible Spending Account (FSA) or use for tax purposes.
OSTEOPOROSIS PREVENTION & BONE DENSITY EVALUATION
Two-part service  | $725

Bone loss (osteopenia or osteoporosis) puts both men and women at risk for spine and hip fractures, a common cause of late-life pain and immobility.

Part I (50 minutes) – Your physician evaluates your bone mineral density using DEXA technology, then explains your results and offers recommendations. For women, this can help in making decisions about hormone replacement therapy, other medications, and exercise programs. Younger women at risk for osteoporosis can use these test results as a baseline in health planning. Men at risk, smokers, and people over 60 should also consider this service–at-risk individuals receive valuable advice about exercise and calcium replacement.

Part II (50 minutes) – A Performance Scientist interprets your test data and helps you design an exercise program to build muscle mass, increase bone density, and reduce the risk of osteopenia/osteoporosis.

NEW PERSONALIZED SPORTS MEDICINE CONSULTATION
25 minutes  | $220
50 minutes  | $400

A Canyon Ranch Board-Certified Sports Medicine physician will consult with you on all aspects of orthopedic and sports health. This includes the professional evaluation of muscle, joint, or tendon injuries and exercise-related health problems toward optimal health and healing. You may receive recommendations for imaging, non-invasive orthopedic procedures, or other modalities.

NEW NON-OPERATIVE ORTHOPEDIC PROCEDURE
50 minutes  | $960

A Canyon Ranch Board Certified Sports Medicine Physician will perform an appropriate non-surgical procedure(s) for a joint and musculoskeletal injury, such as Platelet-Rich Plasma (PRP) injection. Health benefits may include reduced pain with movement, stimulation of the healing process, shortening healing time for injuries, and more.

Please note: A personalized sports medicine consultation is required prior to booking this service.

VASCULAR ULTRASOUND
Two-part service  | Varies
25 minutes/Carotid  | $575
50 minutes/Carotid and CIMT  | $960
150 minutes/Comprehensive  | $2,600
25 minute follow-up appointment with a physician  | $220

Part I (varies) – This non-invasive testing evaluates blood flow in the arteries and veins outside the heart. It can detect plaque, narrowing, blockages, blood clots, incompetent valves and aneurysms, and provide information regarding cardiovascular and stroke risk levels.

Part II (25 minutes) – Results of your ultrasound test are reviewed and discussed with a physician during this follow-up consultation.

SLEEP MEDICINE

SLEEP DISORDER CONSULTATION
25 minutes  | $220
50 minutes  | $400

Emerging evidence supports a link between disrupted sleep and the risk of heart disease, diabetes, atrial fibrillation, ADHD, cognitive decline, and chronic pain. Treating sleep disorders may improve the management of these conditions and contribute to better overall health and well-being. Our physicians assess the nature of your sleep problems and recommend diagnostic and treatment options. If you have daytime sleepiness, wake up often during the night, wake up tired, or if you snore, schedule this consultation early in your stay to allow time for additional testing and assessment.

The following service is available after scheduling a Medical Sleep Disorders or Physician Health Consultation.

SLEEP SCREENING
Overnight with follow-up  | $750

This unmonitored overnight sleep screening test, done in the comfort of your resort room uses an FDA-approved one-time-use portable sleep device to determine wake/sleep states and periods of apnea by using Peripheral Arterial Tone, a physiological signal that mirrors changes in the autonomic nervous system caused by respiratory disturbances during sleep. A physician will review the results of your sleep screening test with you and make recommendations for treatment.
